

PORCELAIN ENAMEL HEAT SHIELDS & HEARTHES

*The ultimate wall and floor
protection for your Stove*

PORCELAIN ENAMEL HEAT SHIELDS & HEARTHES

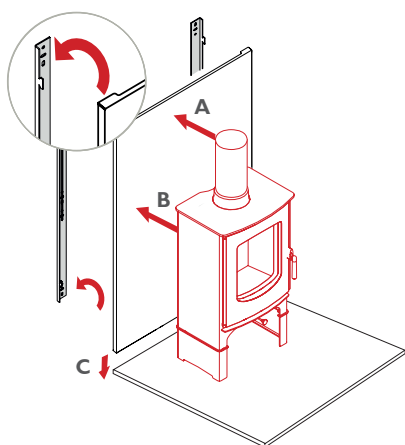

Charnwood Fireside, a range of porcelain enamel heat shields and hearth plates that offer a unique functional finish that is striking and tactile. Made in England.

PORCELAIN ENAMEL HEATSHIELD

41.33" x 47.2" x 1" (1050mm x 1200mm x 25mm)

ULTIMATE HEAT PROTECTION FOR COMBUSTIBLE WALLS

Charnwood Fireside panels use a wall mounted rail system for quick and easy installation and feature a unique dual skin that provides extra thermal protection and an effective convection system that helps distribute heat back into the room.

A: Distance for single wall flue: 1.5 x the diameter. This can be further reduced by using an insulated twin wall flue system.

B: Behind a Charnwood stove, the safety distance between the Heatshield and the rear face of the stove has been tested and certified down to 3".

C: A space of 1" minimum should be left to aid ventilation.

HEARTH PLATE

41.33" x 41.33" x 0.5" (1050mm x 1050mm x 12mm)

SLIMLINE FLOOR PROTECTION

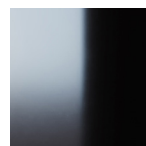

Charnwood Fireside hearth plates create a clean, modern platform on which to stand your stove. An excellent alternative to glass or polished stone. Each hearth features a smooth radius edge and is insulated with fire rated fibreboard to take the heat and weight of the stove while still being light to handle.

WHAT IS PORCELAIN ENAMEL?

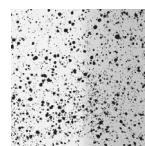

The porcelain enamel surface is created by fusing powdered glass to steel at temperatures in excess of 1400°F. The result is a luxurious vibrant glaze that is heat & fire proof, non-porous and stain resistant.

Charnwood Fireside products are British made by A.J Wells Architectural Enamel, makers of the iconic signage for the London Underground and the Paris Metro.
